Subject index*

A

Acetylcysteine
Effects of repeated administration of *N*-acetyl-L-cysteine on sulfhydryl levels of different tissues and bleomycin-induced lung fibrosis in hamsters (Giri et al). 1988;111:715-24

Acquired immunodeficiency syndrome
Activation of human immunodeficiency virus (Nabel). 1988;111:495-500
Immunologic thrombocytopenic purpura in human immunodeficiency virus–seropositive patients with hemophilia: comparison with patients with classic autoimmune thrombocytopenic purpura, homosexuals with thrombocytopenia, and narcotic addicts with thrombocytopenia (Karpatkin and Nardi). 1988;111:441-8

Acute phase reaction
Examination of interleukin-1 activity, the acute phase response, and leukocyte subpopulations in rats with adjuvant-induced arthritis (Connolly et al). 1988;111:341-7

Adhesiveness
Endothelial-leukocyte adhesiveness (Martin). 1988;111:265-6 (Editorial)
Neutrophil adherence in diabetes mellitus (Sohnle). 1988;111:263-4 (Editorial)

Albumins
Induction of antigen-specific bronchial reactivity to trimellityl–human serum albumin by passive transfer of serum from humans to rhesus monkeys (Dykewicz et al). 1988;111:459-65

Alcohol, ethyl
Role of the liver in alcohol-induced alteration of high-density lipoprotein metabolism (Okamoto et al). 1988;111:482-5

Alcohol, propyl
Hepatic failure toxins depress liver regenerative enzymes after periportal injury with allyl alcohol in the rat (Zieve et al). 1988;111:725-30

Amyloidosis
Immunologic studies in identical twins concordant for juvenile rheumatoid arthritis but discordant for monoclonal gammopathy and amyloidosis (Husby et al). 1988;111:307-14

Analysis of variance
R. A. Fisher and the 0.05 level of significance in medical studies (Jones). 1988;111:491-2 (Editorial)

Glomerular capillary wall charge and antibody binding in passive Heymann nephritis (Hogendoorn et al). 1988;111:150-7
Induction of antigen-specific bronchial reactivity to trimellityl–human serum albumin by passive transfer of serum from humans to rhesus monkeys (Dykewicz et al). 1988;111:459-65

Antibodies, fungal
Enzyme-linked immunosorbent assay for antigens of *Coccidioides immitis:* human sera interference corrected by acidification–heat extraction (Wack et al). 1988;111:560-5

Antibodies, monoclonal
Comparison of properties of monoclonal and polyclonal antibodies against the light chain of human high molecular weight kininogen (Kleniewski et al). 1988;111:93-103
Monoclonal antibodies reacting with placental protein 5: use in radioimmunoassay, Western blot analysis, and immunohistochemistry (Bützow et al). 1988;111:249-56

Antibody affinity
Glomerular capillary wall charge and antibody binding in passive Heymann nephritis (Hogendoorn et al). 1988;111:150-7

Antibody-toxin conjugates
Characterization of the human immune response to a *Pseudomonas aeruginosa O*-polysaccharide–toxin A conjugate vaccine (Cryz et al). 1988;111:701-7

Antidiuretic hormones; *see* **Vasopressins**

Antigen-antibody complex
Influence of polycations on glomerular immune complex localization (Barnes). 1988;111:136-7 (Editorial)

Antigen-antibody reactions
Induction of antigen-specific bronchial reactivity to trimellityl–human serum albumin by passive transfer of serum from humans to rhesus monkeys (Dykewicz et al). 1988;111:459-65

Antigens, fungal
Enzyme-linked immunosorbent assay for antigens of *Coccidioides immitis:* human sera interference corrected by acidification–heat extraction (Wack et al). 1988;111:560-5

Antigens, immune response
Characterization of the human immune response to a *Pseudomonas aeruginosa O*-polysaccharide–toxin A conjugate vaccine (Cryz et al). 1988;111:701-7

Antihypertensive agents
Prostaglandin synthesis inhibitors potentiate the antihypertensive effect of heparin in spontaneously hypertensive rats (Susic et al). 1988;111:63-72

Antithrombin III
Dose-dependent effects of postmenopausal estrogen and progestin

*January, pp 1-134; February, pp 135-260; March, pp 261-360; April, pp 361-490; May, pp 491-594; June, pp 595-752.

on antithrombin III and factor XII (Gordon et al). 1988;111:52-6

Apoproteins
Inhibition of the activation of Hageman factor (factor XII) by β_1-glycoprotein I (Henry et al). 1988;111:519-23
Role of the liver in alcohol-induced alteration of high-density lipoprotein metabolism (Okamoto et al). 1988;111:482-5

Arabinogalactan
Use of arabinogalactan to obtain washed murine platelets free of contaminating plasma proteins and appropriate for studies of function, morphology, and thrombopoiesis (Hill et al). 1988;111:73-83

Arginine vasopressin; *see* **Argipressin**

Argipressin
A dynamic test to investigate potential tissue plasminogen activator activity. Comparison of deamino-8-D-argininevasopressin with venous occlusion in normal subjects and patients (Sultan et al). 1988;111:645-53
Effect of arteriovenous shunting on plasma vasopressin levels in the anesthetized dog (Sklar et al). 1988;111:537-42

Arteriovenous shunt, surgical
Effect of arteriovenous shunting on plasma vasopressin levels in the anesthetized dog (Sklar et al). 1988;111:537-42

Arthritis, adjuvant
Examination of interleukin-1 activity, the acute phase response, and leukocyte subpopulations in rats with adjuvant-induced arthritis (Connolly et al). 1988;111:341-7

Arthritis, juvenile rheumatoid
Immunologic studies in identical twins concordant for juvenile rheumatoid arthritis but discordant for monoclonal gammopathy and amyloidosis (Husby et al). 1988;111:307-14

Ascites
Ascites kinetics in cirrhosis: effects of rapid volume expansion and diuretic administration (Rector). 1988;111:166-72

Aspirin
Prostaglandin synthesis inhibitors potentiate the antihypertensive effect of heparin in spontaneously hypertensive rats (Susic et al). 1988;111:63-72

Asthma
Induction of antigen-specific bronchial reactivity to trimellityl–human serum albumin by passive transfer of serum from humans to rhesus monkeys (Dykewicz et al). 1988;111:459-65

Atrial natriuretic peptides; *see* **Natriuretic peptides, atrial**

Autoantibodies

Myristyl-gamma-picolinium chloride
Myristyl-gamma-picolinium chloride suppresses cartilage and synovial membrane glycosaminoglycan synthesis (Myers and Stack). 1988;111:203-10

N

Narcotic dependence
Immunologic thrombocytopenic purpura in human immunodeficiency virus–seropositive patients with hemophilia: comparison with patients with classic autoimmune thrombocytopenic purpura, homosexuals with thrombocytopenia, and narcotic addicts with thrombocytopenia (Karpatkin and Nardi). 1988;111:441-8

Natriuretic peptides, atrial
Atrial natriuretic peptide inhibits angiotensin II–induced contraction of isolated glomeruli and cultured glomerular mesangial cells of rats: the role of calcium (de Arriba et al). 1988;111:466-74

Nephritis
Glomerular capillary wall charge and antibody binding in passive Heymann nephritis (Hogendoorn et al). 1988;111:150-7

Neural conduction
Isolated vitamin E deficiency in the absence of fat malabsorption—familial and sporadic cases: characterization and investigation of causes (Sokol et al). 1988;111:548-59

Neurohumor receptors; *see* **Receptors, neurohumor**

Neurologic manifestations
Neurologic abnormalities in cobalamin deficiency are associated with higher cobalamin "analogue" values than are hematologic abnormalities (Carmel et al). 1988;111:57-62

Neurotensin
Effect of adrenal function on gastrointestinal peptide release in experimental cardiac arrest (Wortsman et al). 1988;111:104-9

Neutrophils
Activation of the human neutrophil respiratory burst by an anion channel blocker (Markert et al). 1988;111:577-83
Endothelial-leukocyte adhesiveness (Martin). 1988;111:265-6 (Editorial)

Relationship between membrane depolarization and extracellular calcium influx during neutrophil activation (Berger and Birx). 1988;111:384-92

Nuclear factor-kappa B
Activation of human immunodeficiency virus (Nabel). 1988;111:495-500

O

Oxygen
Activation of the human neutrophil respiratory burst by an anion channel blocker (Markert et al). 1988;111:577-83

Oxygen, adverse effects
Hyperoxic lung injury in mice: effect of neutrophil depletion and food deprivation (Smith et al). 1988;111:449-58

P

Pancreatic polypeptide
Effect of adrenal function on gastrointestinal peptide release in experimental cardiac arrest (Wortsman et al). 1988;111:104-9

Paraproteinemias
Immunologic studies in identical twins concordant for juvenile

rheumatoid arthritis but discordant for monoclonal gammopathy and amyloidosis (Husby et al). 1988;111:307-14

Parenteral hyperalimentation
Essential fatty acid deficiency and neutrophil function: studies in lipid-free total parenteral nutrition in monkeys (Palmblad et al). 1988;111:634-44

Pathology
The extracellular matrix in pathology (Bruijn et al). 1988;111:140-9

Pemphigus
Autoantibodies and cell-to-cell detachment in pemphigus (Anhalt). 1988;111:13-4 (Editorial)
Complement fixation by pemphigus antibody. IV. Enhanced epidermal cell detachment in the absence of human plasminogen (Doubleday et al). 1988;111:28-34

Peptides
Atrial natriuretic peptide inhibits angiotensin II–induced contraction of isolated glomeruli and cultured glomerular mesangial cells of rats: the role of calcium (de Arriba et al). 1988;111:466-74
Effect of adrenal function on gastrointestinal peptide release in experimental cardiac arrest (Wortsman et al). 1988;111:104-9

Perfusion
Effect of meclofenamate on lithium excretion in response to changes in renal perfusion pressure (Haas et al). 1988;111:543-7

Peritoneal dialysis
Comparison of different volume markers in peritoneal dialysis (De Paepe et al). 1988;111:421-9

Phagocytosis
Fibronectin and phagocytic clearance mechanisms (Marino and Spagnuolo). 1988;111:493-4 (Editorial)
Kupffer cell complement receptor clearance function after surgical injury and phagocytosis of immune complexes: effect of changes in plasma fibronectin (Loegering et al). 1988;111:504-10

Phenotype
Analysis of immunophenotype, genotype, and lineage fidelity in blastic transformation of chronic myelogenous leukemia: a study of 20 cases (Adachi et al). 1988;111:125-32

Phosphatidylcholines
Diet-induced asymmetry of the phosphatidylcholine fatty acyl composition in rat erythrocyte membranes (Kuypers et al). 1988;111:529-36

Phosphoinositides
Phosphoinositide content of erythrocyte membranes in cystic fibrosis (Cohn et al). 1988;111:336-40

Phospholipases
Concordance of endogenous cortisol and phospholipase A_2 levels in gram-negative septic shock: a prospective study (Vadas et al). 1988;111:584-90

Phospholipids
Diet-induced asymmetry of the phosphatidylcholine fatty acyl composition in rat erythrocyte membranes (Kuypers et al). 1988;111:529-36

Phosphorus
Protein phosphorylation during tannin-mediated activation of human platelets (Hempel et al). 1988;111:299-306

Placental proteins; *see* **Pregnancy proteins**

Plasma
Neutrophil adhesion dysfunction in diabetes mellitus: the role of cellular and plasma factors (Andersen et al). 1988;111:275-85
Sensitive and specific enzyme-linked immunosorbent assay for urokinase-type plasminogen activator and its application to plasma from patients with breast cancer (Grøndahl-Hansen et al). 1988;111:42-51
A simple and accurate microplate assay for the determination of factor XI in plasma (Scott and Colman). 1988;111:708-14

Plasma membrane; *see* **Cell membrane**

Plasma proteins; *see* **Blood proteins**

Plasminogen
Complement fixation by pemphigus antibody. IV. Enhanced epidermal cell detachment in the absence of human plasminogen (Doubleday et al). 1988;111:28-34

Plasminogen activator, tissue-type
A dynamic test to investigate potential tissue plasminogen activator activity. Comparison of deamino-8-D-arginine vasopressin with venous occlusion in normal subjects and patients (Sultan et al). 1988;111:645-53

Plasminogen activators
Sensitive and specific enzyme-linked immunosorbent assay for urokinase-type plasminogen activator and its application to plasma from patients with breast cancer (Grøndahl-Hansen et al). 1988;111:42-51

Platelet activating factor
Pulmonary hypertension and edema induced by platelet-activating factor in isolated, perfused rat lungs are blocked by BN52021 (Imai et al). 1988;111:211-7

Platelet aggregation
Evidence of increased association of fibrinogen with platelets caused by sodium citrate (Bowry et al). 1988;111:315-25
Preservation of in vitro function of platelets stored in the presence of inhibitors of platelet activation and a specific inhibitor of thrombin (Bode and Miller). 1988;111:118-24
Protein phosphorylation during tannin-mediated activation of human platelets (Hempel et al). 1988;111:299-306

Platelet count
Evaluation of bone marrow megakaryocyte ploidy distributions in persons with normal and abnormal platelet counts (Mazur et al). 1988;111:194-202

Platelet function tests
Use of arabinogalactan to obtain washed murine platelets free of contaminating plasma proteins and appropriate for studies of function, morphology, and thrombopoiesis (Hill et al). 1988;111:73-83

Platelet membrane glycoproteins
Identification of a unique type of thrombopathy of human platelets: defect in the exposure of active fibrinogen receptors in a patient with Friedreich's ataxia (Kornecki et al). 1988;111:618-26
Irreversible platelet fibrinogen interactions occur independently of fibrinogen alpha chain degradation and are not mediated by intact platelet membrane glycoprotein IIb-IIIa complexes (Peerschke). 1988;111:84-92

Effects of repeated administration of *N*-acetyl-L-cysteine on sulfhydryl levels of different tissues and bleomycin-induced lung fibrosis in hamsters (Giri et al). 1988;111:715-24
Sweat
Variable reduction in β-adrenergic sweat secretion in cystic fibrosis heterozygotes (Sato and Sato). 1988;111:511-8
Sympathetic nervous system
Abnormal orthostatic changes in blood pressure and heart rate in subjects with intact sympathetic nervous function: evidence for excessive venous pooling (Streeten et al). 1988;111:326-35
Synovial membrane
Myristyl-gamma-picolinium chloride suppresses cartilage and synovial membrane glycosaminoglycan synthesis (Myers and Stack). 1988;111:203-10
Systole
Behavior of postextrasystolic His-Purkinje system refractoriness after multiple premature beats (Tchou et al). 1988;111:405-15

T

Tannins
Protein phosphorylation during tannin-mediated activation of human platelets (Hempel et al). 1988;111:299-306
Thalassemia
Malaria in β-thalassemic mice and the effects of the transgenic human β-globin gene and splenectomy (Roth et al). 1988;111:35-41
Thrombin
Preservation of in vitro function of platelets stored in the presence of inhibitors of platelet activation and a specific inhibitor of thrombin (Bode and Miller). 1988;111:118-24
Thrombocytes; *see* **Blood platelets**
Thrombocytopenia
Heparin-associated thrombocytopenia and thrombosis (Bell). 1988;111:600-5
Immunologic thrombocytopenic purpura in human immunodeficiency virus–seropositive patients with hemophilia: comparison with patients with classic autoimmune thrombocytopenic purpura, homosexuals with thrombocytopenia, and narcotic addicts with thrombocytopenia (Karpatkin and Nardi). 1988;111:441-8
Thrombopoiesis; *see* **Blood coagulation**
Thrombosis
Heparin-associated thrombocytopenia and thrombosis (Bell). 1988;111:600-5
Tissue-type plasminogen activator; *see* **Plasminogen activator, tissue type**
Tobacco
Cigarette smoking, lung inflammation, and the development of emphysema (Niewoehner). 1988;111:15-27
Decreased ceruloplasmin ferroxidase activity in cigarette smokers (Pacht and Davis). 1988;111:661-8
Enhanced cytotoxic potential of alveolar macrophages from cigarette smokers (Davis et al). 1988;111:293-8
Spontaneous hydrogen peroxide release from alveolar macrophages of patients with active sarcoidosis: comparison with cigarette smokers (Baughman et al). 1988;111:399-404
Tomography, emission computed
Survival of rabbit platelets labeled with gallium 67 (Mazoyer et al). 1988;111:218-23
Total parenteral nutrition; *see* **Parenteral hyperalimentation**
Toxicology
Copper toxicity in Wilson's disease: an absorbing problem (McClain and Shedlofsky). 1988;111:261-2 (Editorial)
Enhanced cytotoxic potential of alveolar macrophages from cigarette smokers (Davis et al). 1988;111:293-8
Studies of cholecystokinin-stimulated biliary secretions reveal a high molecular weight copper-binding substance in normal subjects that is absent in patients with Wilson's disease (Iyengar et al). 1988;111:267-74
Toxin-antibody conjugate; *see* **Antibody-toxin conjugates**
Trachea
A radiolabel ratio method for measuring pulmonary clearance of intratracheal bacterial challenges (LaForce and Boose). 1988;111:158-65
Transdermal administration; *see* **Administration, cutaneous**
Trimellityl
Induction of antigen-specific bronchial reactivity to trimellityl–human serum albumin by passive transfer of serum from humans to rhesus monkeys (Dykewicz et al). 1988;111:459-65
Twins
Immunologic studies in identical twins concordant for juvenile rheumatoid arthritis but discordant for monoclonal gammopathy and amyloidosis (Husby et al). 1988;111:307-14

U

Uremia
Defect in cholesteryl ester transport in serum of patients with uremia receiving maintenance hemodialysis: increased inhibitor activity for cholesteryl ester transfer (Mendez et al). 1988;111:677-83
Urokinase
Sensitive and specific enzyme-linked immunosorbeorbent assay for urokinase-type plasminogen activator and its application to plasma from patients with breast cancer (Grøndahl-Hansen et al). 1988;111:42-51

V

Vaccines
Characterization of the human immune response to a *Pseudomonas aeruginosa O*-polysaccharide–toxin A conjugate vaccine (Cryz et al). 1988;111:701-7
Vasculitis
Fibrinolysis abnormalities in systemic lupus erythematosus and their relation to vasculitis (Awada et al). 1988;111:229-36
Vasoactive intestinal peptide
Effect of adrenal function on gastrointestinal peptide release in experimental cardiac arrest (Wortsman et al). 1988;111:104-9
Vasopressin, arginine; *see* **Argipressin**
Vasopressins
Effect of arteriovenous shunting on plasma vasopressin levels in the anesthetized dog (Sklar et al). 1988;111:537-42

Role of antidiuretic hormone in the attenuated furosemide response observed during indomethacin administration (Kirchner). 1988;111:237-43

Venous insufficiency

A dynamic test to investigate potential tissue plasminogen activator activity. Comparison of deamino-8-D-arginine vasopressin with venous occlusion in normal subjects and patients (Sultan et al). 1988;111:645-53

Venous pressure

Abnormal orthostatic changes in blood pressure and heart rate in subjects with intact sympathetic nervous function: evidence for excessive venous pooling (Streeten et al). 1988;111:326-35

Vitamin B_{12} deficiency

Neurologic abnormalities in cobalamin deficiency are associated with higher cobalamin "analogue" values than are hematologic abnormalities (Carmel et al). 1988;111:57-62

Vitamin E deficiency

Isolated vitamin E deficiency in the absence of fat malabsorption—familial and sporadic cases: characterization and investigation of causes (Sokol et al). 1988;111:548-59

Volume expansion

Ascites kinetics in cirrhosis: effects of rapid volume expansion and diuretic administration (Rector). 1988;111:166-72

W

Waksman, Selman A.

Selman A. Waksman and the first use of streptomycin (Daniel). 1988;111:133-4 (Cover illus. note)

Western blot analysis

Monoclonal antibodies reacting with placental protein 5: use in radioimmunoassay, Western blot analysis, and immunohistochemistry (Bützow et al). 1988;111:249-56

Wilson's disease; *see* **Hepatolenticular degeneration**

Wintrobe, Maxwell M.

Maxwell M. Wintrobe (1901-1986) (Warren). 1988;111:731-2 (Cover illus. note)

Wounds and injuries, surgery

Kupffer cell complement receptor clearance function after surgical injury and phagocytosis of immune complexes: effect of changes in plasma fibronectin (Loegering et al). 1988;111:504-10

Y

Yersinia enterocolitica

Impaired neutrophil defense against *Yersinia enterocolitica* in patients with iron overload who are undergoing dialysis (Cantinieaux et al). 1988;111:524-8
